EDUCATION

University of Florida

Bachelor of Science in Computer Science

May 2028

GPA: 4.00

Relevant Coursework: Data Structures & Algorithms, Computer Organization, Software Development, Operating Systems, Programming I & II, Discrete Mathematics

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, SQL, Go

Frameworks/Technologies: React, Flask, FastAPI, Firebase, Flutter, OpenCV, MediaPipe, Unity

DevOps/Cloud: Git, Docker, Kubernetes, Terraform, Ansible, GitHub Actions, Kafka, GCP (Cloud Run), AWS

EXPERIENCE

Software Engineer

Dream Team Engineering

January 2025 – Present

Gainesville, FL

- Develop ROM, a mobile app that leverages AI-driven motion tracking with **OpenCV/MediaPipe** to help patients at UF Health Shands regain mobility through accessible, data-driven physical therapy.
- Optimized the **Flask** backend for image analysis, enhancing efficiency by **60%** through adaptive frame-rate tuning, and developed RESTful endpoints for testing, user feedback, and **Firebase** authentication.

AI Undergraduate Researcher

University of Florida

August 2024 – May 2025

Gainesville, FL

- Helped identify linguistic patterns associated with Hoarding Disorder by building an AI model that analyzed over **1000** clinical transcripts, detecting a **30%** increase in specific conversational shifts.
- Streamlined the research pipeline and improved processing efficiency by developing **FastAPI** endpoints to serve ML models for large-scale text analysis.

Software Engineering Intern

Athlogic, Inc.

May 2024 – July 2024

New York City, NY

- Accelerated the deployment of new features for a football analytics application by **80%** through automating the setup of cloud server infrastructure using **Terraform**.
- Lowered crash frequency by **25%** by diagnosing and documenting **15+** critical infrastructure issues and coordinated outreach with **10+** collegiate athletic programs.

LEADERSHIP

Discrete Structures Teaching Assistant

University of Florida

August 2025 – Present

Gainesville, FL

- Mentor **330+** students in *Applications of Discrete Structures* by delivering instruction on time and space complexity, graph traversal, cryptography, recursion, and foundational programming in C++ and Python.
- Reduce grading time by **80%** by developing a Python script with **pandas** to automate grade input, which improved accuracy for hundreds of students across multiple courses.

UI/UX Director

Society of Hispanic Professional Engineers (SHPE)

August 2024 – Present

Gainesville, FL

- Improve usability and engagement for **800+** members by mentoring **5+** directors in advanced Figma workflows to redesign SHPEUF's site and app.

PROJECTS

MedMind (React Native, AWS (Lambda, DynamoDB, Cognito), Terraform)

September 2025 – Present

- Architected a scalable backend and cloud infrastructure for a clinical reasoning mobile app, designed to support over **500** concurrent users and managing **100+** virtual patient cases using **Node.js** and **Amazon DynamoDB**.
- Reduced deployment times by **90%** by automating infrastructure provisioning with **Terraform** and creating a CI/CD pipeline using **GitHub Actions**, while improving diagnostic accuracy by **25%** through an adaptive case selection engine.

MotionMetric (React Native, Flask, Firebase, Google Cloud Run)

August 2025 – November 2025

- Developed a mobile app using **React Native** and computer vision to analyze and provide feedback on an athlete's throwing motion, achieving $\pm 5\%$ precision in measuring key mechanics.
- Provided athletes with real-time, data-driven feedback on throwing mechanics by deploying a **Flask** backend on **Google Cloud Run** to execute Python **MediaPipe** scripts and integrating **Firebase** for database, authentication, and real-time data syncing.
